11. StormWise Downloads Page:

- The [StormWise Downloads](#) page consists of a downloadable version of the StormWise End User License Agreement, StormWise installation files, and tools and resources to help end users get started.

12. Installation History:

- The **Installation History** page gives account managers the ability to monitor and deactivate installations as well as edit / add custom naming conventions for each end user's computer.

1. Installation ID: A given end user's computer installation ID

2. Installation Status: A given end user's computer installation status (Active vs Deactivated)

Note: Account managers can deactivate a computer installation by selecting the red "x" next to the status label

3. Last Check: The last time a given computer accessed the software

4. Name: The name for a given end user's computer. The default naming convention is

USERNAME-@-COMPUTERNAME

Note: Account managers have the ability to customize each name by selecting the pencil icon next to the name. We recommend using the end user's name alongside the device to ensure ease of identification:

Example: Abigail's Computer

13. Session History – Monthly Network Session Activity:

- The [Session History](#) page gives account managers the ability to review and monitor monthly license activity by day, month, and year.

1. Monthly Network Session History: A StormWise license's monthly network activity

Note: Historic network activity data can be filtered by month and year by toggling the corresponding drop-down menus

2. Daily Network Session History: A StormWise license's daily network activity

Note: Hover over and click on a network activity bar to see the activity for a given day including maximum concurrent sessions, overages, and access requests rejected

14. Session History – Computer Usage by Day:

- The [Session History](#) page also gives account managers the ability to review and monitor computer session counts by day.

1. Computer: The name(s) of the computers that have accessed the software for the selected day

2. Session Count: The total session count for a given computer for the selected day

15. Network Sessions:

- The **Network Sessions** page gives account managers the ability to monitor and close real-time network sessions.

1. Session ID / Computer: The ID number(s) and custom name(s) for computers with a real-time network session

2. Allocated / Checked Out: The initial date and time that license access was allocated to a given end user's computer and the last date and time that the license access was "checked out" to the given computer during a real-time network session

Note: The total number of real-time network sessions cannot surpass the number of concurrent users allocated to a given StormWise license shown on the "Details for a StormWise License" page
