

v4.07.12

RELEASE NOTES

(v4.07.12 – September 1, 2026)

A separate installation guide is available with the installation download link:

<https://streamline.tech/stormwise-download-links-and-resources-v1>

This release maintains the functionality of ICPR4 v4.07.11 to include compatibility with the new license manager (StormWise Access Manager). No computational logic or functionality has been modified in this update. *This release does not include a database change from ICPR4 v4.07.08.*

Please note: The 'Who's Online' feature is no longer available due to enhanced administrative features included in the release through the new License Management Portal.

Bug Fix

Database Validation

In ICPR4 v4.07.11, it was possible to open models that were saved or created in a newer database version. A database validation has been reintroduced when models are opened.
