

# V1.0.17

## RELEASE NOTES

(v1.0.17 – January 22, 2026)

A separate installation guide is available with the installation download link:

<https://streamline.tech/stormwise-download-links-and-resources-v1>

This release updates the StormWise Access Manager installer to include compatibility with Windows Server 2022. The dependency detection for the Microsoft Visual C++ Redistributable has been added. No application logic or functional behavior has been modified as part of this update. The changes are limited to installer compatibility checks and prerequisite detection.

*Please note: StormWise v4.08.07 and later require the use of the **StormWise Access Manager**, a new standalone desktop application designed to manage licenses for StormWise and ICPR4 software products. The license management functionality has been decoupled from the main StormWise desktop application to provide greater flexibility, security, and centralized control over license activation and usage.*
