

V1.1.0

RELEASE NOTES

(v1.1.0 – April 27, 2026)

A separate installation guide is available with the installation download link:

<https://streamline.tech/stormwise-download-links-and-resources-v1>

This release includes a few improvements and fixes.

*Please note: StormWise v4.08.07 and later require the use of the **StormWise Access Manager**, a new standalone desktop application designed to manage licenses for StormWise software products. The license management functionality has been decoupled from the main StormWise desktop application to provide greater flexibility, security, and centralized control over license activation and usage.*

Enhancements

- Added installation support for Windows Server 2019
- Installer now detects active StormWise sessions and prompts users to save and close the application before continuing
- Account expiration date is displayed on StormWise Access Manager

Fixes

- Resolved issue where StormWise could fail to launch after a successful StormWise Access Manager login due to a corrupted license file
