

v1.1.1

RELEASE NOTES

(v1.1.1 – June 30, 2026)

A separate installation guide is available with the installation download link:

<https://streamline.tech/stormwise-download-links-and-resources-v1>

This release includes a few improvements and fixes.

*Please note: StormWise™ v4.08.07 and later require the use of the **StormWise™ Access Manager**, a new standalone desktop application designed to manage licenses for StormWise™ software products. The license management functionality has been decoupled from the main StormWise™ desktop application to provide greater flexibility, security, and centralized control over license activation and usage.*

Enhancements

- Improved license storage and activation handling to reduce unnecessary activations in the License Management Portal.
- Improved support for virtual machines, cloud-hosted environments, VDI environments, and VPN-based connections.
- Added diagnostic logging for StormWise™ Access Manager to assist with technical support and troubleshooting.

Fixes

- Expanded the fix introduced in v1.1.0 to further address cases where StormWise™ could fail to launch after a successful StormWise™ Access Manager login due to a corrupted license file.
